

ExhibitNow 1200 *IMMERSE 10ft and RALLY Table*

This PDF template can be opened directly in Adobe Illustrator. You can design right on the “DESIGN HERE” layer, or copy each individual template into the software program of your choice.

*This display kit has multiple graphic panels in it, each with its own Ref Letter.
Please provide separate art for each art reference in the kit.*

Ref A

TRADEWINDS IMMERSE™ 10’ STRAIGHT WITH END PANELS

Create your art in the "DESIGN HERE" layer.

ART SIZE:

This area contains all necessary bleed but is NOT COMPLETELY CUT OFF. YOU MUST FILL WITH BACKGROUND ART! Any art in this area can potentially be cut off, hidden or distorted in the finishing process.

SAFE ART AREA:

Keep all logos, text and critical art in this area.

GENERAL ART INSTRUCTIONS:

- Do NOT embed images - supply LINKED images
- For Transparent Rasters use PNGs or TIFFs
- Resolution should be 100 ppi at full size
- Convert all fonts to outlined artwork
- Best Black=RGB 0-0-0 or CMYK 100-100-100-100
- Preferred Final Art saved as NATIVE ADOBE Art Files
- PDF, JPG, TIF, PNG, EPS files also accepted

COLOR:

Critical colors should be specified as Pantone colors from the Coated or Uncoated swatch library. Pantone colors should be left as swatch callouts within the file. If no colors are noted, then we cannot guarantee color, and will consider the job to "Print As Is".

If choosing to design a continuous image across both the front and end panels, fill the entire template with the continuous art keeping all critical art within the designated green boxes. If you want to design end panels that will be separated from the front panel by a hard image break at the corner, use the "Corner Location" line as the hard color break between the front and end panels. This will keep a distinct separation between the end panels and the front panel.

This is part of a multi-product kit, therefore multiple art files are required for print production. Create art for each reference letter in the kit.
