SHELF AREA

COLOR:

Critical colors should be specified as Pantone colors from the Coated or Uncoated swatch library. Pantone colors should be left as swatch callouts within the file. If no colors are noted, then we cannot guarantee color, and will consider the job to "Print As Is".

Wall panels for (A) can contain either Independent Art, Continuous Art or Combinations of the two given certain restrictions.

If using Continuous Art, layout your artwork across the given template keeping critical art within the Green boxes and allowing background art to cross over the Art Size red lines onto the adjacent panel(s).

If wall panels are to be Independent in design, fill each wall to the given Red box and then use the Red box as a MASK for that independent wall panel to separate the different wall panels.

Don't worry about overlapping the red boxes, the art will be separated along the red box lines during production to insure the integrity of each independent panel.

Please contact your Skyline Representative with questions.
